OVERLOAD PROTECTION | OLP

Attachments

Weighing systems

Camera systems

Features:

- ▶ Measurement accuracy $\pm 2\%$ of the truck capacity
- ▶ Fast installation, calibration, and commissioning
- ▶ High safety and long-term cost reduction through overload protection
- ▶ Compatible with all attachments
- ▶ Acoustic and visual warning

OVERLOAD PROTECTION | OLP

Measuring accuracy $\pm 2\%$ of the truck capacity

Cost-effective system for weight estimation, with the pressure sensor installed directly in the main line to the mast.

Features:

- › Acoustic and visual warning when maximum load capacity is exceeded
- › Fast installation, calibration, and commissioning
- › High safety and long-term cost reduction through overload protection
- › Optional 80 dB external signal device including LED and key switch to deactivate the alarm
- › Compatible with all attachments

Overload protection OLP			
Series	Model	Capacity	Pressure
OLP	Free lift mast / standard mast	corresponds to the truck	0 - 250 bar
