FORK WITH INTEGRATED CAMERA | GripView

Attachments

Weighing systems

Camera systems

Features:

- ▶ Optimal camera positioning, significantly improved visibility
- ▶ Components sustainably protected through full integration into the fork
- ▶ Suitable for light to heavy-duty applications, both indoor and outdoor
- ▶ Excellent image quality through the combination of Orloco camera and monitor
- ▶ The world's most efficient and safest storage and retrieval operations

FORK WITH INTEGRATED CAMERA | GripView

The world's most efficient and safest storage and retrieval operations

Here we combine proven and well-known features of our camera systems with an innovative and sustainable design. Thanks to the fully protected position of the camera in the fork, the camera is also suitable for use on the counterbalance truck. GripView focuses your load handling process on the essentials and shows more of the details that matter. Your active support in reducing sources of danger!

Whether handling loads at height or transporting goods with restricted visibility, GripView significantly improves visibility. Equally suitable for indoor and outdoor applications.

Camera features:

- Protection class: IP 69
- Vibration resistance 50G
- Viewing angle 51°, requires min. 0.05 lux
- AMOS chip technology
- Optional incl. LED for poor lighting conditions

Features:

- Optimal camera positioning, significantly improved visibility
- Components sustainably protected through full integration into the fork
- Suitable for light to heavy-duty applications, both indoor and outdoor
- Excellent image quality through the combination of Orlaco camera and monitor
