Features:

- ▶ Good visibility (patent protected)
- ▶ Reduced weight and lost load center
- ▶ Manual adjustment for crates up to 1600 mm wide
- ▶ Rotation range 10° more than usual

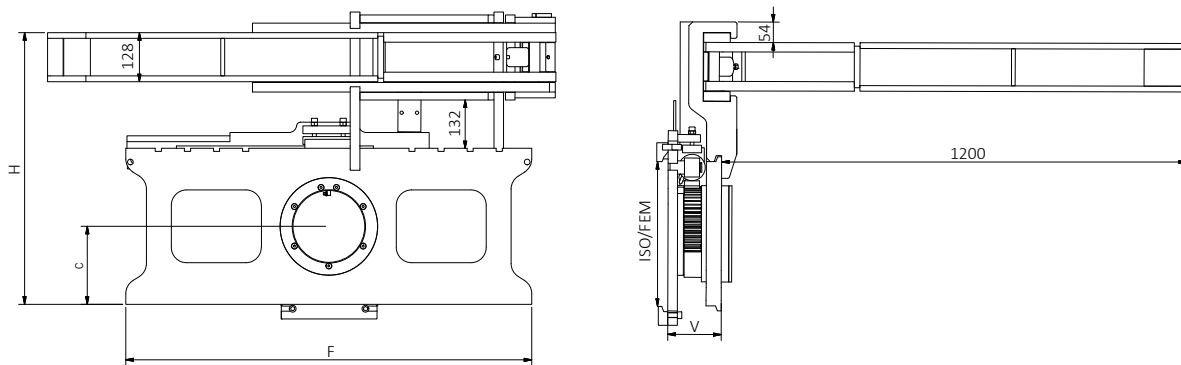

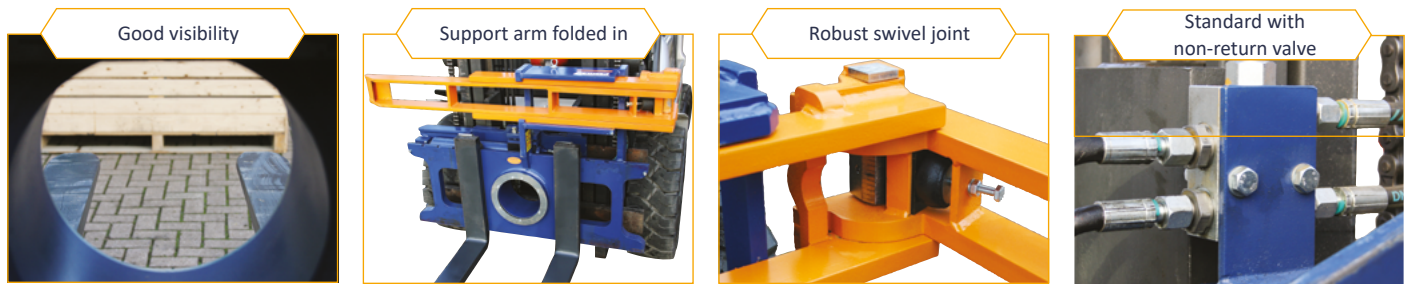

BOX ROTATOR | RM 190°

Rotatable 190° in one direction

Griptech box rotators are suitable for emptying boxes and containers in agriculture and for light industrial applications. The crates, which are closed at the bottom, are secured against slipping with the side clear-view support arm. The RM series can be rotated counter-clockwise 190° as standard via a robust rack and pinion drive. A large plain bearing ensures optimum power transmission and a long service life.

Features:

- Good visibility (patent protected)
- Reduced weight and lost load center
- Robust folding arm with automatic fixing in open or closed position
- Manual adjustment for crates up to 1600 mm wide
- Rotation range 10° more than usual

Box rotator 190° rotatable via rack and pinion drive (1 function without or 2 if with separate sideshift)
