Features:

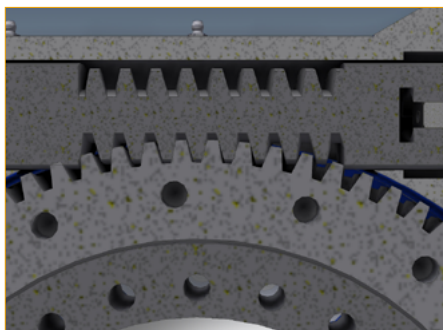

- ▶ Slewing ring with direct drive via a worm gear
- ▶ Suitable for emptying boxes and containers with entry pockets
- ▶ Great visibility
- ▶ Reduced weight and overhang
- ▶ Includes lateral fork locking mechanism

ROTATOR | KIK 360°

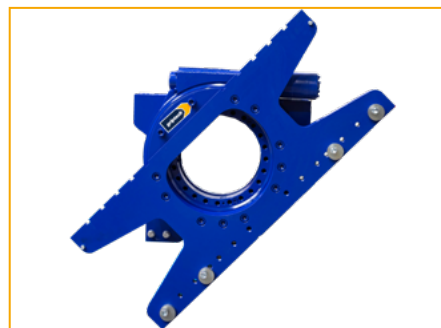

Continuously rotatable in both directions

High-quality rotators with a slewing ring with direct drive via a worm shaft, whereby several windings are always engaged. Suitable for emptying crates and containers with entry pockets for the forks. The devices offer very good visibility. Standard incl. non-return valve and a lateral fork locking mechanism for different fork widths and width positions. We recommend that you use forks with reinforced lower claws.

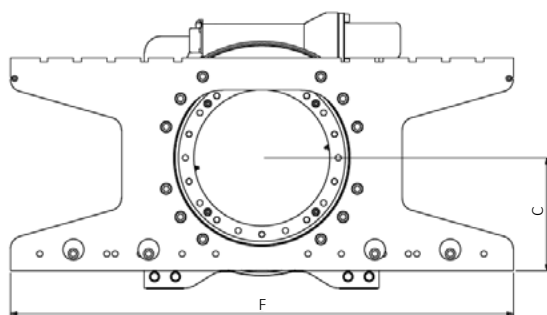

Load capacity up to 3,200 kg.

Direct drive with worm shaft

Including lateral fork locking mechanism

Rotator 360° direct drive via worm shaft (1 function without or 2 if with separate sideshift)
